

Saksham Kumar

sakshamkmr0908@gmail.com — [LinkedIn](#) — [GitHub](#) — +91-8346815478 — VIT Vellore, India

Education

Delhi Public School, West Bengal

Apr 2012 – Mar 2019

Class 10th: 96.2%

Central Public Senior Secondary School, Rajasthan

Apr 2019 – May 2021

Class 12th: 94%

Vellore Institute of Technology, Tamil Nadu

Jul 2022 – Jul 2026

B.Tech in **Computer Science with Business Systems**

Experience

Full Stack Developer Intern (Project-Based)

Apr 2024 – Jul 2025

- Developed **scalable full-stack applications** using React and backend services, integrating **REST APIs** (Google Places, Mapbox) with core **OOP** principles.
- Performed **debugging, testing, and performance optimization** following **SDLC/Agile** practices with Git, applying strong **analytical and problem-solving** skills to troubleshoot issues.

Projects

Trip Planner App – React, Next.js, TypeScript

Mar 2025 – Jul 2025

- Translated user requirements into a scalable full-stack solution focused on improving the **customer experience** through personalized trip planning and real-time API integrations.
- Designed dynamic UI using React with component-based architecture and state management.
- Integrated external APIs, handled edge cases, and improved **system reliability** through structured error handling and testing.
- Conducted testing and debugging to ensure performance and reduce failure scenarios.
- Followed **SDLC and Agile practices** including requirement analysis, iterative development, testing, and deployment.

SolarSurya – Solar Feasibility System – Full Stack Application

Aug 2025 – Present

- Developed a **data-driven application** integrating real-time APIs and business-oriented computation models.
- Built data processing logic for calculating ROI, system size, and energy outputs using core **Data Structures & Algorithms** concepts.
- Implemented **secure authentication**, data validation, and real-time analytics dashboards.
- Applied optimization techniques and handled failure scenarios for reliable, high-performance system behavior.
- Leveraged AI/ML concepts for intelligent recommendations and decision support.

Technical Skills

Digital & Technology: Digital Transformation, Customer Experience Design, Digital Platforms, Technology Solutions, Data Analytics

Languages: C, C++, Java, JavaScript, TypeScript

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems (Linux)

Web & APIs: React.js, Next.js, REST APIs, API Integration, Full-Stack Development

Cloud: Microsoft Azure, Azure AI Services

Databases: MySQL, MongoDB, PostgreSQL

Tools: Git, GitHub, Postman

Methodologies: SDLC, Agile Development

Certifications

- **Microsoft Certified: Azure AI Engineer Associate (AI-102)** – Scored 820/1000.

Activities & Co-curriculars

Performed in college cultural fests (**dance, vocals, keyboard**); represented school **cricket team** in interschool tournaments.
